

Thurs. Nov. 10, 1976

Dear Vicki and Jimmy,

The fog is still thick in the mornings and again at night so the planes are many hours late in landing and taking off. We were lucky on the weather when we went on our trip. I also read in the paper how cold it has been down south, so everything went just perfectly for us.

We finally bought a stereo and I just love it and have it on all day. It has a tape recorder so Mary will enjoy taping the baby's singing and talking. It has the record player of course and we also enjoy that as I have a lot of records.

We had a crab dinner last night as the crab season this fall is one of the greatest in about seven years so the crab are very inexpensive and since they are fresh they are delicious.

Gary and his girl friend are going on a big trip in a couple of weeks. They are going to drive and plan to go to San Francisco and down into Mexico. Gary hopes they can also get up to see you.

Mary had her accounting class Monday night and the results from the test were very good. She missed only one problem and she said it was just a silly mistake. She was the second highest in the class.

Aunt Stella is back from Palm Springs and she had a good time, especially when they stopped in Reno on the way home and stayed there for three days. She won seventy dollars on keno. As soon as she got back home she started getting a bad cold and still isn't feeling very good.

I like reading Look Homeward Angel, for the second time. It is one of my favorite books.

Mary will be bringing Diane over sometime today and she will stay all night and Mary will pick her up sometime over the week-end. I am planning dinner on Thanksgiving and the next day Mike is going to Kettle Falls for the week-end.

Our electricity is going to be turned off pretty soon. The man just came to the door and they are working on the power lines so I am glad that I was able to use the typewriter.

I miss you and think about you all the time.

Love,

Mom.
